JGloss

Please read before using:

1. What files do I need ?
- JCloze5.ht_ (Output 5) *or*
- JCloze6.ht_ (Output 6)

Extract these files into the subfolder **/source/** of the folder Hot Potatoes – a new subfolder will be created.

2. How do I create *JGloss - pages* ?
- Open JCloze and input all your data as usually. Each word or expression which should get an annotation becomes a **gap**; the annotation must be entered as a **clue**.

- There's also the possibility to add a reading text additionally.

3. How do I create my HTML-page ?

- Press the **Shift + Control + ALT + S** keys *simultaneously*.

  You should see the window on the right:

  Choose the folder where the JCloze5.ht_ or JCloze6.ht_ file is located
  (normally. C:/Programs/HotPot5/source/JGloss/);
  Press the OK-key or Return-key.

- Now create your web-exercise
  -- F 5 or Export to Web for Output 5
  -- F 6 for Output 6

- That's it !!!

4. What should I do after creating my exercise ?

- Press the **Shift + Control + ALT + T** keys *simultaneously*.

- Why ?
  Next time the JCloze-programme is loaded, it tries to find all the needed files within the subfolder of the modified source-files – but without success; you would get an error message.

  If you do forget it and get an error message when you open the programme, *don't* be worried about it: just confirm the error message(s) by pressing the OK button – after that the programme will be opened and you can create your exercises as usually; the Hot Potatoes programme has searched for and then loaded all the original source files which are delivered by Martin Holmes and Stewart Arneil.
